# The Reverse

Concept by Dr. Mayur Davda

Think about the end result first!

Invest maximum on flash/ light modifiers

Invest on a good macro lens

Invest minimum on an interchangeable lens camera

Lens & flash is more vital for dental photography not the camera

There shouldn't be a situation wherein we purchase such an expensive camera that we do not have money to buy a good macro lens or external flash

# The Reverse

Concept by Dr. Mayur Davda

Think about the end result first!  
Decide whether you want to  
excel in Aesthetics or otherwise

If Aesthetics is your primary focus then  
invest on:

- 1) Twin flash (Publication)
- 2) Studio lights (Publicity)

(Please remember : It takes patience to use your twin flash skillfully & there is a long learning curve)

# The Reverse

Concept by Dr. Mayur Davda

**Canon MT 26 EX RT**

**Nikon R1 C1**

We do not recommend Youngnuo twin flash.  
Meike wireless twin flash is better than  
youngnuo and available for both Nikon &  
Canon

# The Reverse

**Canon MR 14 EX ii**

If you want a hassle free &  
quicker documentation opt for  
ring flash

# The Reverse

Concept by Dr. Mayur Davda

**YN 14EX / YN 14EX ii**

Watch tutorial here

<https://youtu.be/dADdUi4nMyQ>

Youngnuo's ring flash gives similar results for 1/3rd the cost

Although this flash is for CANON we have used it on Nikon as well (On Manual mode)
